

Deb is a Senior Project Manager of TCE with a particular focus on company sales while managing clients, and leading engineering design teams to meet the goals and objectives to make successful projects.

Deb grew up in Williston and currently resides in Fairfield, VT, where she enjoys backyard gardening, camping and foraging in the woods.

Over the past 30 years Deb has a proven track record of managing mid- to large scale residential and commercial projects. Her position requires a strong attention to detail and the ability to effectively create, maintain and manage to the project schedule. Her ability to work with regulators while also collaborating within a team environment results in an effective communication chain. Deb also has a knack for bringing landowners and developers together through her work in local business networks and her longtime history in the local community.

Volunteer Work

City of South Burlington
Form Based Code Committee

Recent Project Experience

A & C Realty, Essex, VT Deb led the design team for this large mixed use residential and commercial project which included survey, planning, site and utility design and over a mile of force main. She attended project hearings, made public presentations for permit acquisition and coordinated with State and local officials to gain approvals for the project. Deb's scheduling and budget oversight proved valuable to the project team, ultimately resulting in cost savings to the client.

Costco, Colchester, VT Deb served as the Senior Project Manager for the Costco gas facility which included planning, site design, permitting and public hearing presentations. She was the applicant's lead witness at the environmental court proceedings providing expert testimony regarding local zoning regulation compliance. Her determination and communication skills have assisted the client in making the project successful during the challenging permitting process.

Copley Hospital, Morrisville VT Deb has been involved with the two latest facility improvements at the hospital which included the emergency room expansion and most recently the construction of the new surgical suite. The project included survey, site planning, permitting and stormwater design. Deb led the project team in providing on-time and on-budget projects resulting in a satisfied client and repeat customer.
