Randolph, VT 1996-1998

Volunteer Work

VT Society of Land Surveyors
President,
Executive Committee 2018

Mark is the Vice President and Director of Field Services overseeing the Land Surveying and Underground Locating staff while providing valuable senior level surveying expertise as a Project Manager on a wide variety of projects. Mark coordinates the work efforts and quality control for the majority of TCE's field work.

Mark is a resident of Essex Junction, VT where he and his wife Cheryl are raising three boys. His boys keep him busy with youth hockey, soccer and track. Mark also enjoys spending time at his family camp in Isle La Motte.

Over the past 29 years in surveying, Mark has gained a broad knowledge base of the industry through a variety of positions, affiliations and owning and operating a successful Land Surveying business.

Recent Project Experience

Temporary Drawbridge Layout Services, Route 2 - Grand Isle, VT

TCE was contracted to provide construction layout services of the construction of a temporary drawbridge along Route 2 over Lake Champlain, connecting Grand Isle and North Hero. Our services have been performed on a mostly full time basis offering key layout points for contractors drilling piles to ensure proper alignment and fitment of the mechanical drawbridge. This has been a very exciting and unique project and we are proud to be part of the effort.

Department Brief

Under Mark's direction, the field services staff at TCE performed more than one hundred new boundary, topographic and FEMA related surveys and more than six hundred underground locating calls as well as countless construction layouts, updates to pre-existing projects, and many engineering support surveys in 2019.

At the beginning 2020, under the supervision of Mark, TCE merged its Underground Locating Services (Vermont Underground Locators) with our existing Survey Services to form TCE Field Services. TCE Field Services now consists of four full time technicians and part time support from two additional technicians from the Engineer Department.

Additional Projects

- Hammond Boundary, Essex
- Mongeon Boundary, Williston
- Smith Boundary, Georgia
- Benson Boundary, Cambridge
- Manosh Boundary, Wolcott
- Bass Boundary, Shoreham
- Draper Boundary, Williston
- Cianbro Layout Svcs, Grand Isle
- Acabay ALTA Survey, Colchester
- McGrath Boundary, Colchester
- Lindgren FEMA Survey, Sheffield
- Young Boundary, Rickingham
