

Gerald is a licensed land surveyor bringing a wide range of experience and skill sets to his projects with a diverse experience that includes work in municipal, state, federal, and private sectors.

Gerald is a resident of Jericho, VT where he is raising twin teenage boys, so managing a survey department is a piece of cake for him. In his free time, Gerald enjoys being involved in community theatre and *Nightmare Vermont* where he is the “construction boss”.

Gerald Stockman, LLS

Recent Project Experience

Public Infrastructure Surveys

Gerald has performed and/or oversaw several topographic and bathymetric surveys on multiple flood control dams in Vermont, Massachusetts, and Pennsylvania. He has also been involved in multiple topographic surveys of general aviation airports in Vermont, New Hampshire, Massachusetts, and Maine, as well as contributing to several multi-mile route surveys of VT State Highways including statutory resurveys of Williston Road and VT Route 17 in Addison.

Boundary Surveys

Gerald has completed several large boundary surveys in the New England area. Some examples include the Middlebury State Airport in Vermont, and 3,200 acres of Wildlife Management Area for the New Hampshire Fish & Game Department.
